

key ingredients:

Hydroxy acids gently dissolve dead skin cells and stimulate cell renewal, improving skin texture and making skin more flexible.

Japanese Unshiu Citrus Peel helps control melanin production, naturally brightening and evening out skin tone.

Rooibos Extract (derived from the South African Red Bush) combined with soothing Green Tea acts as a powerful antioxidant and soothes skin during the resurfacing process.

reveal yourself

Instantly resurface, smooth and brighten skin with Dermalogica's new **Daily Resurfacer**

Daily Resurfacer is Dermalogica's exclusive three-in-one treatment that resurfaces and smooths skin without causing irritation or redness, helps reduce the signs of premature aging, and brightens to help even skin tone and balance pigmentation. Designed for daily use, **Daily Resurfacer** has a distinctive ability to leave skin smoothed, brightened and hydrated.

the pouch

The breakthrough design of the pouch and sponge applicator delivers a precise dose of **Daily Resurfacer** to the skin in a clean and efficient manner. The hermetically-sealed pouch guarantees application without contamination or waste, while the sponge evenly distributes the treatment and adds to the effectiveness of the resurfacing process.

a better way to exfoliate

Daily Resurfacer was developed to meet the desire for an effective exfoliant that works without stripping or irritating, all while providing the benefits of smoother and brighter skin. The slow-release properties of **Daily Resurfacer** allow it to work continuously, which is why we call this controlled yet effective process *resurfacing* rather than just exfoliation. Suitable for all skin conditions, except users of medically prescribed exfoliants.
